Career Objective: Entry-level Passionate software engineer dedicated to designing and developing cutting-edge solutions that drive technological advancement and exceed client expectations

PROJECT

1.EMPLOYEE MANAGEMENT SYSTEM using MERN Stack

- Developed a **MERN** Stack application that seamlessly used for managing employee's record of organization. Implemented in a way that only authorized people can access their account with their verified id-no.

2.AGRICO

- An Agricultural E-commerce website (using **MERN** Stack) connects farmers directly with consumers, earning a wide variety of products such as seeds, tools, fertilizers, and fresh produce. The platform allows farmers to easily list and manage their products, ensuring better visibility and access to a larger market

3. A device Tracker (<https://device-tracker-syga.onrender.com>)

- A device Tracker This project is a real-time device tracking application built with Node.js, Express.js, Socket.io, and EJS. It enables users to track and monitor the location of devices on a live map.
